

NAME

rwmtx_destroy - destroy a read/write lock

SYNOPSIS

library "threads"

#include <threadse.h>

int

rwmtx_destroy(*rwmtx_t* **rw*);

DESCRIPTION

The function **rwmtx_destroy**() will destroy the given read/write lock *rw*.

RETURN VALUES

Upon success **rwmtx_destroy**() will return *thrd_success*. In case of error *thrd_error* will be returned.

SEE ALSO

rwmtx_init(3) rwmtx_rdlock(3) rwmtx_wrlock(3) rwmtx_tryrdlock(3) rwmtx_trywrlock(3)
rwmtx_timedrdlock(3) rwmtx_timedwrlock(3) rwmtx_unlock(3)

HISTORY

The **rwmtx_destroy**() function first appeared in the Adelsbach Enhanced Threading Library.
