

NAME

thrd_yield - yield the execution to another thread

SYNOPSIS

library "threads"

#include <threads.h>

void

thrd_yield();

DESCRIPTION

The function **thrd_yield**() will yield execution from the current thread to an other thread, that have the same or a higher execution priority.

SEE ALSO

thrd_create(3) thrd_exit(3) thrd_current(3) thrd_detach(3) thrd_join(3) thrd_equal(3) thrd_sleep(3)

HISTORY

The **thrd_yield**() function first appeared in the C11 standard ISO/IEC 9899:2011.
